

WINS SOFT INNOVATIONS PRIVATE LIMITED

www.winssoft.com

Our Mission

Empowering businesses with innovative technology for Manufacturing, Trading, and Export companies through our ERP software

Our Vision

We will radically shift the small, medium, and big-sized enterprises towards an enormous business entity.

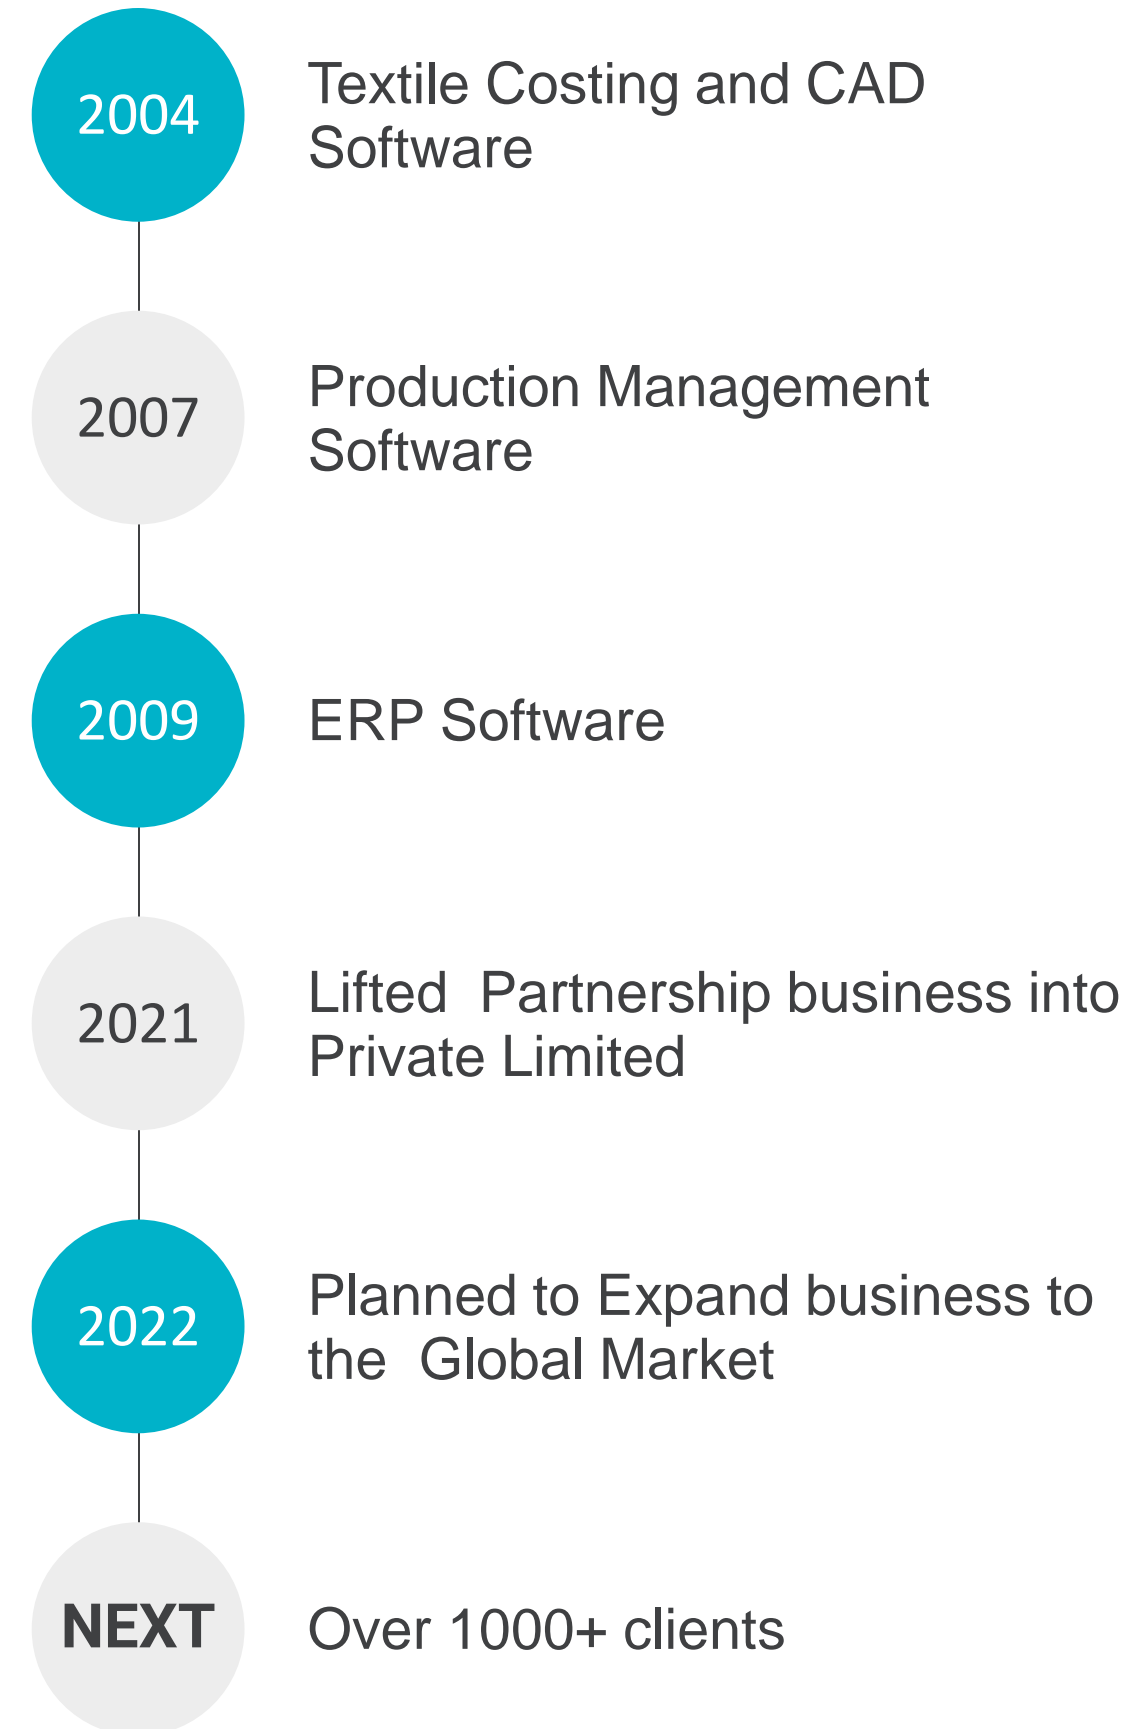

Wins Soft, established in the year 2004 by two young competitive and methodical minds, creates ERP solutions that provide growth and agility.

We are very strong with the ERP for the textile industries including spinning, weaving, Wet Processing, fabrics and garment sectors, and Dairy (Milk) industries.

WINS SOFT INNOVATIONS PRIVATE LIMITED

DAIRY ERP

Farm to Consumer

The milk and Dairy industry is one of the backbones of our Indian economy. Our 4M approach helps in managing the continuous flow between the machineries to the logistics. We focus on standardizing all the scattered processes and information on a single platform to increase the overall growth of the organization.

CUSTOMIZED ERP

Offset Printing | Food Industry | Poultry

Investing in a correct ERP will double, triple, or even quadruple your business profits.

Textiles, Dairies, Offsets, and many other companies are looking for ERP solutions to fit their specific needs.

Wins Soft tech team gives the liberty to implement your requirements about that function into the ERP cloud with no hindrance.

This advantage has helped to increase not only our client's business scope but also their reputation in the market.

BPM -Business Process Mapping

SOW -Statement of Work

SD -Software development

UAT -User Acceptance Test

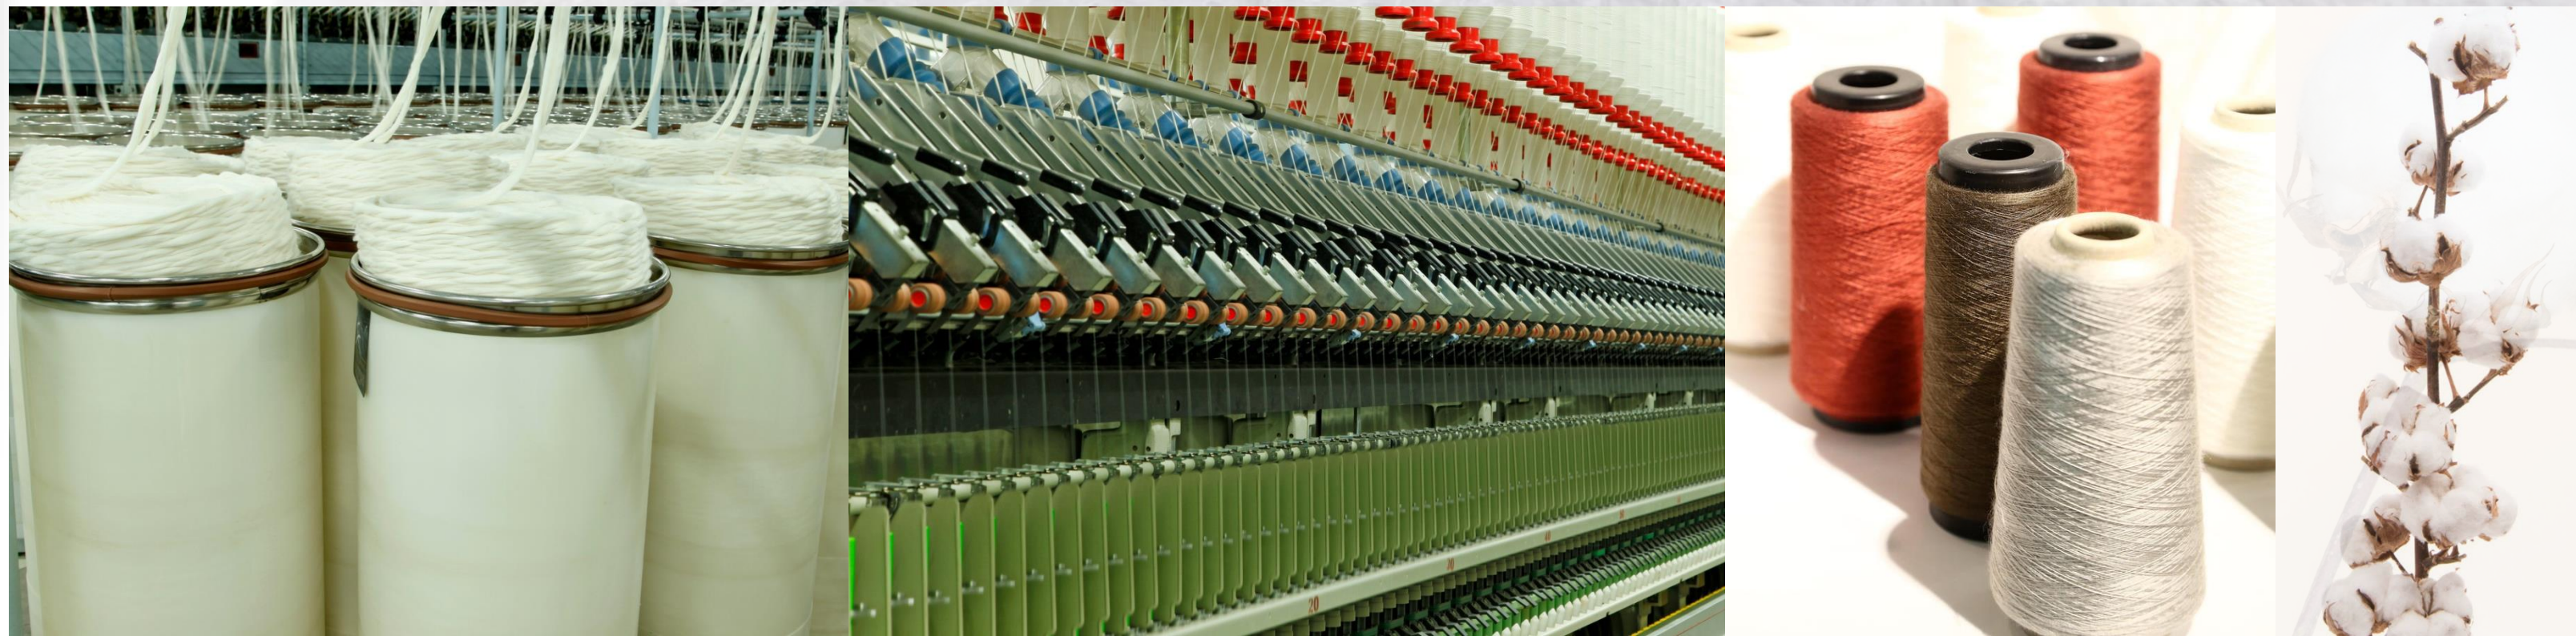

TEU -Training to End User

Go LIVE

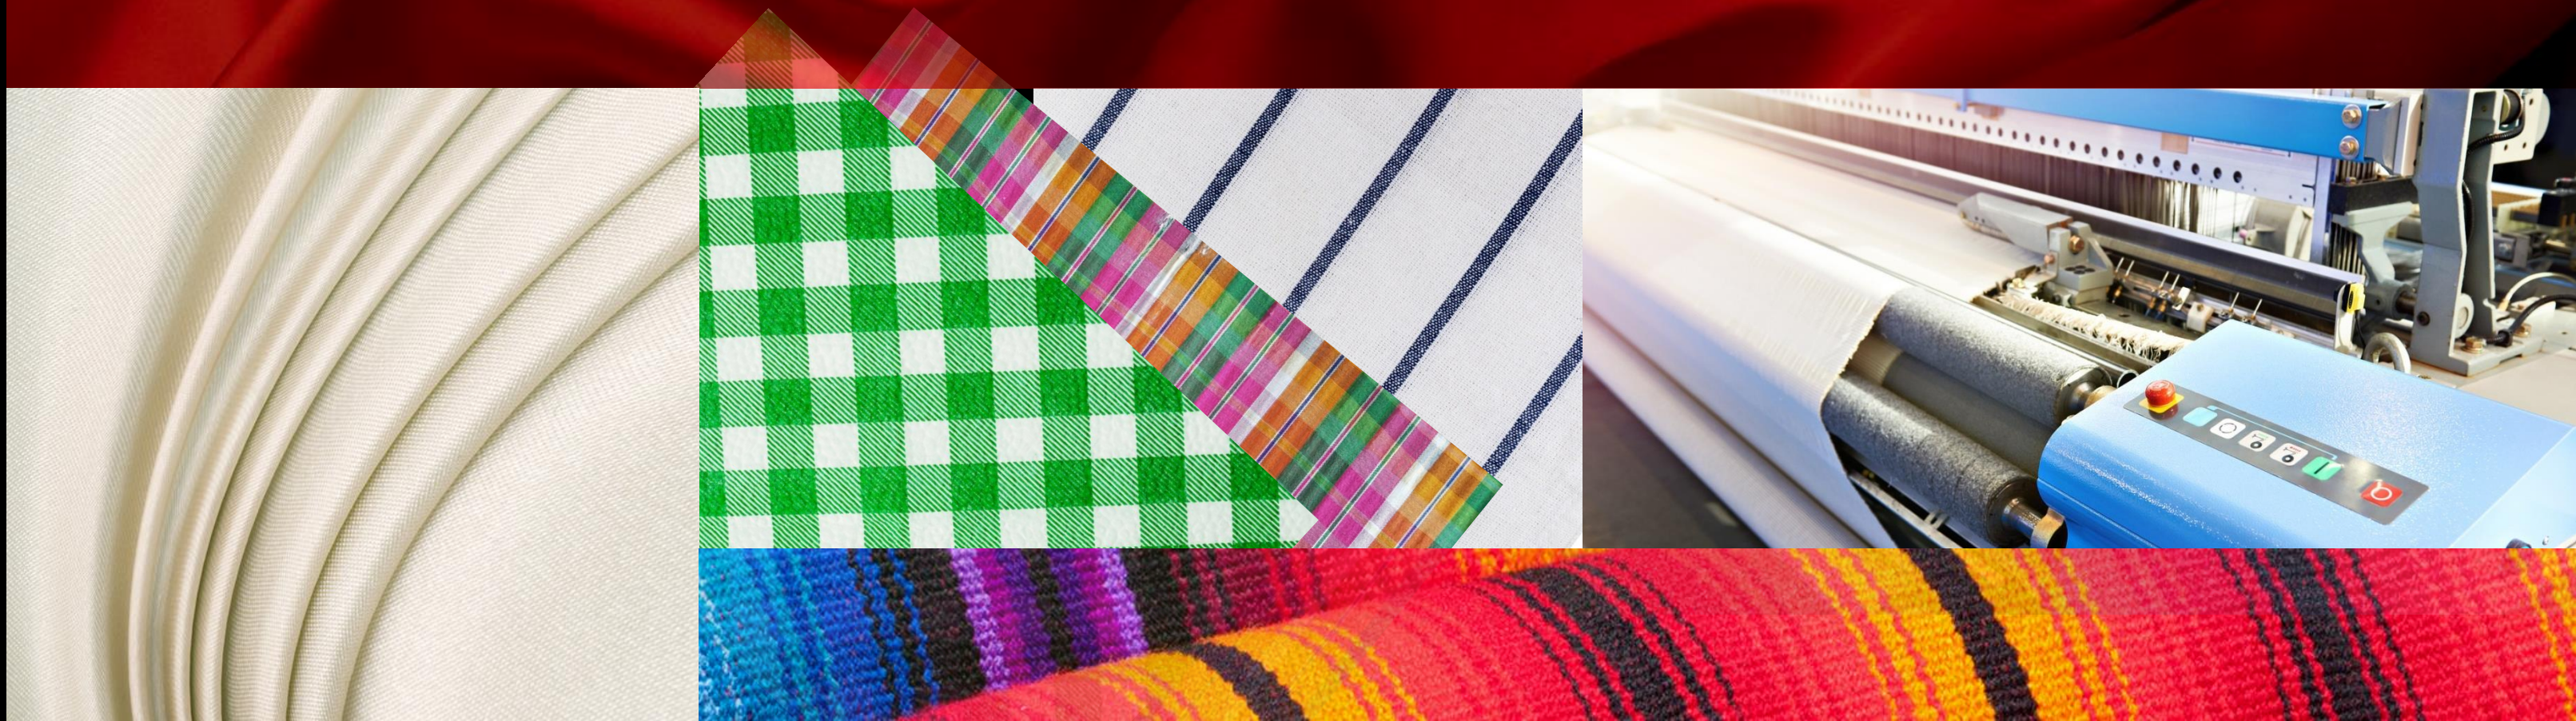

SPINNING ERP

We ensure to turn your raw material into well-laid yarn bundles. Our solution offers seamless communication between your machinery through a robust synchronized IT system. From controlling the thickness to transporting them to your warehouse, your mill will function just like a well-greased car.

WEAVING ERP

Let your weaving process flow chart come into reality with no obstacles. As your production unit flows with its weaving process, your inventory updates. We can provide a comprehensive solution to your weaving administration with our digital automation modules.

HOME TEXTILE ERP

Home Textiles like Living, Kitchen, Bedlinen, Domestic clothes, and even a small table cloth needs a real-time data management system without redundancies.

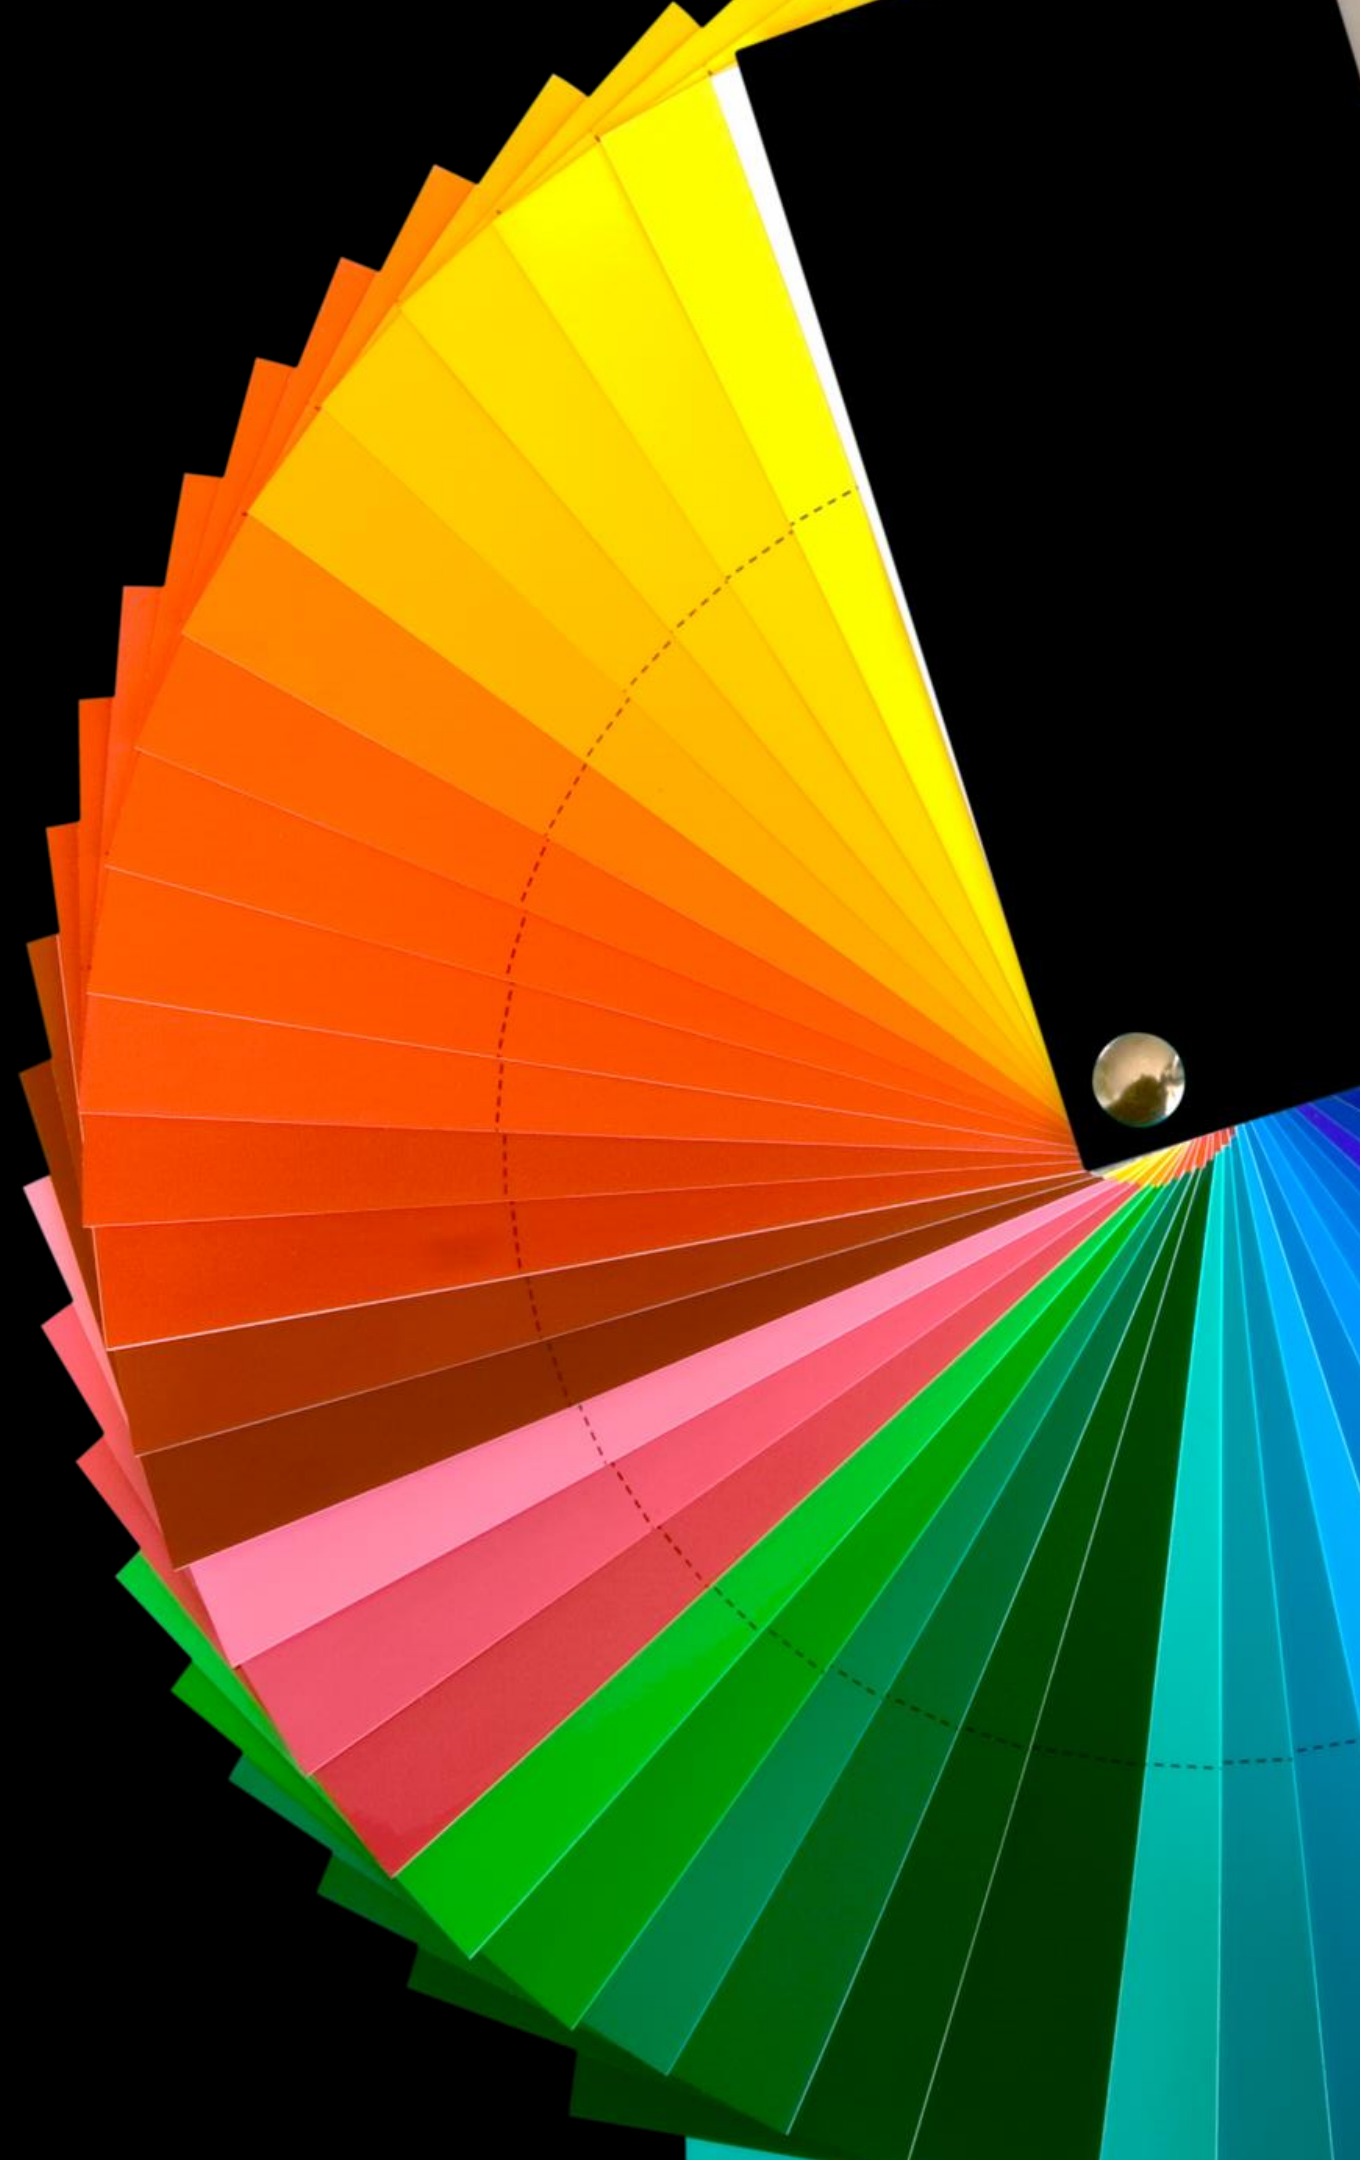

Wins Soft brings a holistic approach and gives you full control of your flow; procurement of raw materials to collecting end-user reviews.

TEXTILE CAD

Stay ahead of the competition with your innovations in the textile and fashion industry. A creative garment house will require flexible CAD software to face significant challenges to remain competitive in today's industry, including supplying innovative collections at the right price, controlling margins, designing personalized garments, enhancing brand image, building customer loyalty and expanding business horizons.

One Ship Two Captains

Hi, We are Karthikeyen and Rajasekaran. While we were young adults back during our 20's, the love for the textile business pushed us to seek solutions for the obstacles in that sector. While implementing various business ERP solutions across south India and also to the global SMBs, we found each business is very unique in its own way. A defined, pre-built ERP model lacked some flexibility which is crucial for a successful business framework. So, it made us invent solutions for the people behind those processes. The win-win needs to be between the people and the technology. We are here to uncover your success through digital solutions. **Wins Soft Innovations Private Limited** provides winning solutions for you and your business.
